

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A method, comprising:

receiving information identifying a payment account having at least one of an account-level and a corporate -level restriction on use;

identifying an earlier authorization request that involved said payment account, where said earlier authorization request was declined for a prior purchase transaction for failing to comply with said at least one of an account-level and a corporate -level restriction on use; and creating a manual authorization record for said payment account and said purchase transaction using information from said earlier authorization request, said manual authorization record temporarily overriding said at least one of an account-level and a corporate -level restriction on use and allowing approval of a second authorization request involving said payment account and said purchase transaction.

2. (Previously Presented) The method of claim 1, wherein said payment account is associated with a purchasing card issued to a purchasing entity having a program administrator.

3. (Original) The method of claim 2, wherein said manual authorization record is created in response to a request by said program administrator.

4. (Previously Presented) The method of claim 1, wherein said payment account is associated with at least one of MCC, account-level, a corporate-level, and standard industrial code (SIC) authorization controls.

5. (Previously Presented) The method of claim 4, wherein said first authorization request is declined based on a failure of said transaction to comply with at least one of said MCC, said account-level, said corporate-level, and said SIC authorization controls associated with said payment account.

6. (Previously Presented) The method of claim 4, wherein said manual authorization record operates to override at least one of said MCC, said account-level, said corporate-level, and said SIC authorization controls associated with said payment account.

7.-9. (Canceled)

10. (Previously Presented) An apparatus, comprising:

a processor; and

a memory in communication with said processor and storing instructions for operating said processor to:

receive an earlier authorization request message, said earlier authorization request message identifying a payment account having at least one of an account-level and a corporate – level restriction on use and identifying terms of a prior transaction;

declining said earlier authorization request message based on a failure of said terms of said prior transaction to comply with said at least one of an account-level and a corporate –level restriction on use;

establishing a manual authorization record for said payment account and said purchase transaction including information from said earlier authorization request message; and

authorizing a subsequent authorization request message associated with said payment account to temporarily override said at least one of an account-level and a corporate –

level restriction on use by comparing terms of said subsequent transaction with said manual authorization record.

11. (Original) The apparatus of claim 10, wherein said payment account is associated with a purchasing card issued to a purchasing entity having a program administrator.

12. (Original) The method of claim 11, wherein said manual authorization record is created in response to a request by said program administrator.

13. (Previously Presented) The method of claim 10, wherein said payment account is associated with at least one of a merchant category code (MCC), account-level, corporate-level, and standard industrial code (SIC) authorization controls.

14. (Previously Presented) The method of claim 13, wherein said first authorization request is declined based on a failure of said prior transaction to comply with said at least one of MCC, account-level, corporate-level, and SIC authorization controls.

15. (previously canceled)
